Education

2022   **Barani Institute Of Information Technology(BIIT)**
MSc
Computer Science, BSCS, Bachelor In Computer Science
CGPA: 3.3/4

Projects

Home Health Care (Final Year Project)

http://Not Deployed Yet

Home Health Care is a website where patients can acquire medical facilities at home. This website eradicates the need to go to a hospital for basic treatments like nursing, physiotherapy etc. It comprises of 3 phases patient phase, App Administration, and Organization Administration. Patients can check availability, Schedule a meeting and rate a staff member. Among available staff, a staff member is selected based on his/her rating It's been automated no Administration indulgence. Organization administration deals with manipulating services and staff. App Administration permits an organization admin to be associated with Home Health Care.Its been made with React JS,Node JS and Mongo DB (Database)
